Notes:

-Adobe PDF files may be viewed by double-clicking on the filename. This will launch Adobe Acrobat Reader if it is present in your system.

-Adobe PDF files may be batch printed by tagging multiple files in the Slick! files window. When you issue the Print command from the Slick! menu, click on Tagged Files in the print dialog box. This will use Adobe Acrobat Reader to batch print the pdf files.

-Microstation DGN and SolidWorks files may be viewed in a similar fashion if a viewer is registered to their respective extensions.
