

PRE-INSTALLATION DOCUMENT

README FIRST BEFORE INSTALLING SLICK! V8.5 LT or SLICK! V8.5 FULL VERSION.

INSTALLING FROM CD-ROM

- insert the CD into the CD-ROM drive
- click on Run from the Windows Start menu
- browse to the root directory of the CD
- run setup.exe
- the install program will extract the files and proceed to setup and configuration

INSTALLING FROM INTERNET FILES

- download the self-extracting installation file slk80ltx.exe for Slick! LT or slick80x.exe for Slick! full version
- run the program from the Windows Start menu
- the install program will extract the files and proceed to setup and configuration

Configuration

Slick! must be configured before you can run it. The configuration program for Slick! LT is slcflgt.exe; the configuration program for Slick! full version is slcflgwin.exe.

The setup program will prompt for a configuration directory. If you have installed the Slick! files on a file server, you must create and specify a configuration directory in a client machine's local drive, for example, c:\slick85.cfg or c:\slicklt85.cfg.

Database Files

The database option is not available for Slick! LT. This is only available in the full Slick! version.

Running Slick! V8.5

To run Slick! in demo mode, just click on the demo button.

If you have purchased a license, enter the serial number and authorization code when prompted. Then click on the License button.

The executable file for Slick! LT is slicklt.exe.

The executable file for Slick! full version is slickwin.exe.
